Brand New Book ***** Print on Demand *****.Excerpt from Original Solutions of Several Problems in Aerodynamics The employment of the laws and principles of dynamics in discussing the movements of the parts of an aerial medium caused by the action of a local force impressed upon them, or by their own inherent elastic force causing them to flow towards a total or partial vacuum, has heretofore been thought by mathematicians to be attended with great difficulties; so great indeed that few attempts were made to surmount them, and none that were attended with full and complete success. Hence many problems in aerodynamics, that were of great interest to science and the arts, remained unsolved. Some years since I became deeply interested in an attempt to solve one of these problems, and after much thought succeeded in devising a method whereby a satisfactory solution was accomplished. Perceiving that the saute method, with suitable modifications, was applicable to the solution of other problems, I gave my thoughts to others from time to time as I found leisure amid the active pursuits of life; and the results...
