Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1893 Excerpt: .is already, at least, cultivated; that is much. The disposition to learn to think philosophically will then easily be yielded to. And now, finally, the natural sciences. What profitable objects for learning and teaching do the descriptive sciences--botany, geology, and mineralogy--afford! It is a mistake to suppose that university teachers lay most weight on systematic knowledge. Not at all. The systematic method, it is true, is learned at the universities. It does no one harm to be able to learn and distinguish a certain number of plants, animals, or stones. But the instruction proper should consist in the training of the senses, especially of the sight and feeling. At present we have to lament that a large part of our students have no exact knowledge of colors, that they make false estimates of the forms of the objects they see, and they manifest no comprehension of the consistence and exterior constitution of bodies. Nothing should be easier than to cultivate an accurate judgment concerning color and form, if besides the comprehension of the body the representation of it by a simple or colored drawing, though it were only a sketch, were learned. Every one can make such knowledge useful. It is of great value to medical men, for diagnoses of the most important conditions are not rarely dependent upon it. The experimental sciences, especially physics and chemistry, are also indispensable in school instruction, because more than all other branches they lead to the knowledge of the...
