Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from The Intestinal Putrefactions: Clinical Studies of Enterocolitis In the year 1906, Professor Herter published his epochmaking work on the Common Bacterial Infections of the Digestive Tract. Before this, other medical thinkers had pointed out the way; Schmidt and Strasburger had published their monumental work on the human feces and Metchnikoff had noted the connection between intestinal putrefaction and the duration of human life. It remained for Herter, however, to give the impulse that led to the application of these discoveries in clinical practice. It was through his classic teaching that physics learned to use the three great weapons: chemistry, bacteriology and biology, in the fight. Various phenomena such as hyperand hypochlorhydria, indicanuria and autointoxication, so called, fitted themselves into the clinical pictures; diseases that at first sight seemed to be intimately connected with faulty metabolism in the human tissues were proven to arise not through any parenteral biochemical process but in spite of it. Organic lesions were given the prominent position that they deserve, while the various types of intestinal putrefaction were used as avenues of information through which a knowledge of the nature and mode of attack of the enemy might be gained. In the preparation of this book, that great enemy of the arts, fleeting time, has, of necessity, placed certain limitations upon the task. Its preparation has been a labor of great satisfaction. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy....
