Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from The Physiology of Industrial Organisation and the Re-Employment of the Disabled To assist in the work of organising labour according to rational laws; to assign to each man his true function in the social machine; to enable the hale man and the war-cripple to collaborate in the economic tasks of to-morrow; to formulate concisely the doctrine of the maximum utilisation of the physical and psychical energies, without losing sight of the moral factor: these are the motives which impelled me to write this book. It is frankly addressed to the general public, and it deals, in a pedagogic sense, with the ordinary avocations. Whether in the matter of physical education and hygiene, or the organisation of apprenticeship and labour, or that technical re-education whose programme we have had to devise, while co-ordinating the efforts made to realise it, in these sorrowful times it is the duty of each one of us actively to participate. I have briefly stated why and how. Further, I have everywhere laid stress upon the intimate connection between science and economic wealth, between method and technique and national prosperity. In the same spirit I have elucidated the problems of prothesis, for France and England might place themselves at the head of the orthopaedic industry of the whole world, as of many another industry. The condition is that they must eschew routine, a factor which enervates the inventive spirit of the race. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work.
