The Selected Works of Phillip A. Griffiths with Commentary: Pt. 1-4 (Hardback)

By -

American Mathematical Society, United States, 2003. Hardback. Book Condition: New. 264 x 184 mm. Language: English . Brand New Book. Over the last four decades, Phillip Griffiths has been a central figure in mathematics. During this time, he made crucial contributions in several fields, including complex analysis, algebraic geometry, and differential systems. His books and papers are distinguished by a remarkably lucid style that invites the reader to understand not only the subject at hand, but also the connections among seemingly unrelated areas of mathematics. Even today, many of Griffiths papers are used as a standard source on a subject. Another important feature of Griffiths writings is that they often bring together classical and modern mathematics. The four parts of Selected Works - Analytic Geometry, Algebraic Geometry, Variations of Hodge Structures, and Differential Systems - are organized according to the subject matter and are supplemented by Griffiths brief, but extremely illuminating, personal reflections on the mathematical content and the times in which they were produced. Griffiths Selected Works provide the reader with a panoramic view of important and exciting mathematics during the second half of the 20th century.
