Reviews

This publication will be worth purchasing. It really is written in simple terms instead of difficult to understand. It's been designed in an exceptionally simple way and is particularly only right after I finished reading this ebook in which basically modified me, alter the way I believe.

(Prof. Loyce Runolfsson Jr.)

HIGH PERFORMANCE COMPUTING IN SCIENCE AND ENGINEERING '99

Book Condition: New. Publisher/Verlag: Springer, Berlin | Transactions of the High Performance Computing Center Stuttgart (HLRS) 1999 | Prof. Dr. Egon Krause Aerodynamisches Institut, RWTH Aachen Willnerstr. 5 u. 7, D-52062 Aachen Prof. Dr. Willi Jager Interdisziplinäres Zentrum für Wissenschaftliches Rechnen Universität Heidelberg Im Neuenheimer Feld 368, D-69120 Heidelberg High Performance Computing is progressing as a discipline providing important tools for research and development in science and industry. The High Performance Computing Center Stuttgart (HLRS) is not only providing the facilities, hardware and software for a growing community of researchers and developers, but it also promotes the know-how to use supercomputers efficiently. Regular exchange of information, of ideas and methods is essential in improving the proper use of the facilities, and their performance as well as the application of algorithms and of simulation techniques. A Second Result and Review Workshop on High-Performance Computing in Science and Engineering, (October 4 - 6, 1999) was organized by the HLRS in order to give an overview of the scientific work carried out during the past year and to demonstrate the state of the art in the various fields. In 1998 the Land Baden-Württemberg decided to extend the responsibilities of the Steering Committee of the HLRS and therewith also the rules of access to its Scientific Supercomputing Center (SSC) Karlsruhe. That center was recently upgraded with the IBM RS 6000 SP, thereby significantly increasing the attractiveness of the two centers, since the joint portfolio of computer architectures now covers most of the application-profile of their users. | Physics.- Finite difference modelling of elastic wave propagation in the Earth's uppermost mantle.- Direct Simulation of Seismic Wave Propagation.- Summary of Project 11172.- Development and Astrophysical Applications of a Parallel Smoothed Particle Hydrodynamics Code with MPI.- Collisional dynamics around black hole binaries in galactic centres.- IMD - A...
